Woodland Wonders Tower Range is available in the following deck sizes and deck heights. The modular range allows all the units to be supplied in any deck configuration. Bespoke units available.

Deck Options

- 990mm (Small)
- 1200mm (Medium)
- 1578mm (Large)

Height Options

- 600mm
- 900mm
- 1200mm
- 1500mm

Fully customizable to fit any outdoor space, with adjustable heights and widths. Whether you need a large adventure zone or a compact play feature, each tower can be tailored to create a safe and exciting environment for children of all ages.

Bespoke Towers available, enquire for more information.

Example Woodland Tower

Steel Feet

Galvanised steel feet offer an alternative to 'in-ground' timbers and can be used in both wet pour surfacing or extended to accommodate loose fill bark. The feet are securely fixed to the timbers prior to dispatch with all fixings concealed.

Timber Treatment

The ability to offer extensive warranties is in part down to the meticulous treatment process each timber goes through. All timbers are kiln dried at a low temperature to the optimum moisture content. This slow drying process minimises the chances of the timber cracking and ensures the maximum treatment penetration. The timbers are then pressure treated using the UK's leading wood preservative. This advanced protection offers a comprehensive and proven barrier against the threat of wood decay and insect attack for in ground contact timbers. Once treated, the timbers do not require further coating to ensure they out perform their warranty period.

Bespoke Towers available, enquire for more information.

The ability to offer unrivalled value for money whilst still ensuring exceptional quality and longevity is key. The Woodland Wonders range accommodates all ages, budgets and play scheme sizes. Our uncompromising approach to safety during the design and manufacturing process is paramount. With this in mind all the Woodland Wonders range are designed to meet the requirements of BS EN 1176.

Choose from either standard towers or create a bespoke design using the interchangeable modular play elements.

In order to ensure the highest level of accuracy, all units are produced on our custom made, state of the art, 6 Axis CNC machine. This technology allows us to offer unparalleled accuracy in the field of play timber production.
